DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Monday, 03 January 2022 at 05:45 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Low levels of air pollution are forecast across the UK. Southern parts of England and Wales will see little change in pollution conditions compared to previous days, whilst colder, clearer air spreads south across Scotland and into northern England and Northern Ireland.

Tomorrow: A cold day, with strong north to northwesterly winds helping to ensure air pollution levels remain Low.

Outlook: Cold, but sunny Wednesday, followed by wetter and windier weather Thursday, then cold, showery weather Friday. These changeable conditions preventing the build-up of pollutants with Low air pollution levels forecast
